

Our art in nature

From a single spur of a vine, many clusters are born: similarly, from the vision of **Lorenzo Colucci**, more than thirty years ago, the passion was born, and today it is shared by his daughters. Thanks to this continuity between generations, **TopFruit** distributes quality table grapes, which are famous both in Italy and Europe.

Best quality table grapes

In **Casamassima**, in the province of Bari, their factory covers an area of **4000 square metres**. Of these, **1000** are dedicated to state-of-the-art cold storage facilities, where innovative conservation technologies are employed. They grow and market quality table grapes in Italy and Europe, with full respect for the environment and ripening times.

**For over 30
years only
the best**

From father to daughters,
all with the same passion, all bound
by a deep love for their land and
Table grapes. Together, they made
Top Fruit and its production renown
also abroad.

Let's introduce you to the Colucci family

They have been here for more than 30 years, yet they continue to look ahead.

The two types of grapes they grow -**with and without seeds** - represent the two souls of their company.

Seeded grapes

Each single berry is full of promise for the future. Grapes with seeds represent our attention to Mother Earth, to which we cyclically return. From the roots comes the seed, from the seed the roots: through generations, they ensure the quality of the product. Always new, always the same.

Features

Produced between June and December, seeded grapes have more developed berries. Usually crunchy and sugary, they are tasty on the palate.

Vittoria

White table grapes, the result of crossbreeding, with yellow, spherical berries. Vigorous and able to withstand shipping. Their peculiarity is the precocity of the bud.

Black Magic

Their elliptical, blackish-blue berries have few seeds. On the palate, however, they are sweet and not very acidic.

Palieri

Their berries - large, oval, purplish - have a medium-thick cuticle. The pulp is firm and juicy, while the flavour is neutral.

Italia

Large and heavy, their bunches are good-looking. Their cultivar is among the most sugary and popular in our country: both for aroma and musty flavour.

Red Globe

The berries are spheroidal and bluish-pink in colour. In addition to strength, they are highly valued for their appearance and taste.

Black Pearl

As the name implies, their berries are black-purple. They grow in semi-erected, medium-sized bunches, whose shape is cylindrical-elliptical. They ripen between September and December.

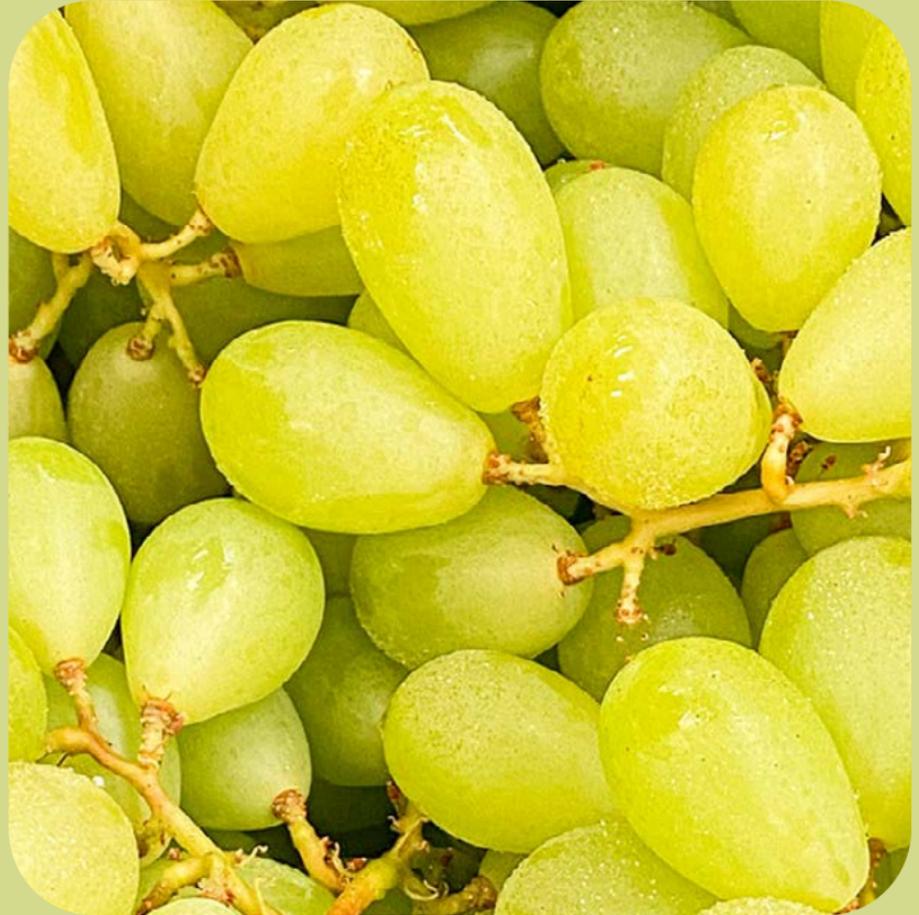

Seedless grapes

Fresh, light, almost smart. Seedless grapes represent the courage they put into product innovation. Here, every single berry is preserved with care and attention, and it is with them that the secrets of tradition are preserved.

Features

Seedless grapes grow and ripen between June and November. Their berries are crunchy; the pulp juicy, thirst-quenching, sometimes fruity.

Fragolino Seedless

The flagship. Or rather, the fruit: pinkish grapes with a hint of strawberry, which is why they are so popular with children. They are also sweet, healthy and perfect for a snack on the fly.

White Seedless

These grapes, with their light, but not always equal, skin colour, are crisp, full-bodied and incredibly tasty.

Red Seedless

Red-purple, juicy and sweet berries and pruinose skin. Their image is perhaps the first that springs to mind when you think of grapes.

Black Seedless

Soft and delicate black grapes, like their ripening season: between late summer and autumn.

Seedless strawberry grapes, our flagship.

A favourite among adults and loved by children, the strawberry-flavoured, seed free **Fragolino Seedless** grapes are sweet, crunchy and the pride of the production for uniqueness of taste and freshness.

Our Packaging

Wooden or cardboard boxes

Did you know that using wooden crates and cardboard boxes has a lower environmental impact?

Here you can find both in formats: 30x40 and 30x50.

Trays

Practical and suitable for any need: 250 g, 500 g and 1 kg trays of grapes. And not only that, you can find mono packs and mix varieties.

Biodegradable bag

Every grape has the bag it deserves. This is why you will find biodegradable shopping bags among the packs, which respect the fruit and its preservation.

On-the-go Brick

For a healthy snack you can always take with you: each brick contains fresh grapes. Don't throw it away, reuse it.

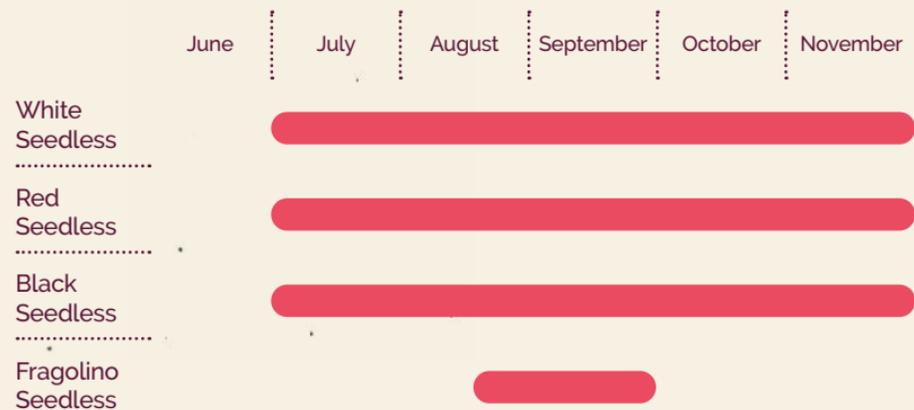

Grapes with seeds

Calibre:

Grapes with seeds have a size ranging from 20 mm to 24 mm.
For the Red Globe variety, the calibre is 22 mm to 26 mm.

Grapes without seeds

Calibre:

Seedless grapes vary in size from 18 mm to 24 mm.
